PROFIL

Motivated full-stack developer with a strong foundation in computer science and hands-on experience building real-world web applications using Next.js, React, TypeScript, and Supabase. Skilled in solving complex technical problems, designing scalable architectures, and delivering clean, maintainable solutions. Eager to contribute to impactful projects and continuously improve through real-world development challenges.

PROJECT EXPERIENCE

The Time Palace — Fullstack E-commerce Platform (Next.js, Supabase, MUI)

<https://the-time-palace.vercel.app>

- Built a modern second-hand luxury watch platform with complete reservation flow, SEO-optimized catalog, and a full admin dashboard.
- Implemented SSR-powered product catalog, improving search engine visibility & reducing first-content load time.
- Built dynamic brand & category filters that auto-generate based on database entries (no manual configs).
- Designed a supabase client split (server + browser) to fix session issues across SSR/CSR environments.
- Developed admin dashboard with charts, statistics, and role-based access using Supabase Auth + React Query.
- Implemented server-side aggregation using PostgreSQL json_agg view to reduce multi-query overhead into a single ultra-fast API call.

The Pelataran Website — Cabin Booking Platform (Next.js, Supabase, NextAuth)

<the-pelataran-website.vercel.app>

Booking system for a real accommodation business.

- Implemented full booking process: cabin listing, availability checking, and offline payment workflow.
- Built authentication with NextAuth + PostgreSQL session storage.
- Designed responsive UI with TailwindCSS and component-based architecture.
- Created Supabase relational schema for cabins, bookings, and users.

The Pelataran Dashboard — Admin Dashboard SPA (Vite, React Query)

<the-pelataran-dashboard.vercel.app>

- Created SPA dashboard to manage bookings, cabins, and users with React Query caching & prefetching.
- Built editable tables, sorting, filtering, and pagination that update in real-time without page reloads.
- Developed modular UI using Styled Components + custom hooks for data fetching.

PROFESSIONAL EXPERIENCE

SAP FICO Consultant — Hand Solution Indonesia

Jakarta | Sep 2024 – Present

- Supported enterprise-level financial operations across multiple entities.
- Handled incident resolution, month-end closing support, and system issue debugging.
- Collaborated across teams to improve reporting accuracy and workflow reliability.

EDUCATION

Shanghai University

Bachelor of Computer Science Computer Science

Jul 2020 - Jun 2024

LANGUAGES

- Bahasa Indonesia (native)
- English (fluent)
- Chinese (fluent)
